MY TRAVEL NETWORK – PORTAL DEVELOPMENT TEAM

Lead Web Developer/Database Administrator, MAR 2002 to OCT 2002

MY TRAVEL NETWORK develops products and services for the global group travel industry that modernise information management and support a smooth, affordable transition to e-business. My role was to lead small team of Web Developers to manage existing Internet products to support the client’s business and solutions strategy.

RESPONSIBILITIES

- Database Administration tasks included; performance tuning, scheduled backups, emergency restoration planning and testing.
- Develop new functionality for the MTN Portal to the client’s specifications.
- Maintain / Bug fixes / Test cases on existing functionality
- Schedule and run two-weekly content deployment via XML technologies.

- Schedule and run weekly project version control releases.
- Supporting the branching / mainline versions of the Internet portal across development, test and live environments.
- Revising, executing and managing test plans and their reporting including the management of large volumes of regression & stress testing.

DCG (now Avanade Australia)

Back End Developer, FEB 2001 to MAR 2002

DCG is an e-Business, consulting and web integration specialists providing comprehensive solutions to clients through the integration of strategic, creative and customised e-initiatives. My role was an ASP and SQL Server developer building high end Internet applications focusing on the back end development requirements including database design and scripting to meet technical and business requirements.

RESPONSIBILITIES

- Creating prototypes and functional specifications for software projects and proposals.
- Authoring web projects and responsible for change management.
- Develop technical solutions to customer functionality requirements.
- Effective communication and undertake the most efficient ways of approaching development tasks.
- VB6, SQL 2000, ASP, HTML/DHTML, COM, XML, Internet technologies

ZIVO - E-COMMERCE TEAM

Intern, SEP 2000

Zivo Internet was a leader in Australasia for e-Commerce solutions.

RESPONSIBILITIES

- Develop ASP & SQL Server applications from functional specifications.

SKILLS

- Client Consulting – By using techniques such as interviews and workshops, I have scoped engagements through to project close-out.
- Team Work – I have worked in small and large teams with customers and colleagues to drive towards a common result. I have also worked by myself on rapid prototyping.
- Lead Teams – Through leading teams of both technical and non-technical backgrounds I have been able to achieve project cohesion and the desired outcomes.
- Communications
 - Presentations – Delivered presentations to customers, colleagues and IT Professionals in groups ranging from 3 to 50 both virtually and in person. I am currently scheduled to speak at TechEd Australia on Microsoft Content Management Server.
 - Author – In final stages of co-authoring a technical reference book titled “Advanced Microsoft Content Management Server Development”, expected publish date of late August 2005. I also connect with the wider community via my blog (www.anguslogan.com).
 - Documentation – Prepared documentation for technical developers, customers, end users. I have also worked on tender responses, and expression of interests.

List available on request.
